

Who are we?

- I+K established in 1993
- Specialists in development of software for the managed compliance of:
 - Safety data sheets
 - Labels (use & transport)
 - Worker instructions
 - Transport emergency cards
- Offers a complete document management service
- Experienced team (100+ years) in:
 - PU chemistry and technology
 - Regulatory Compliance (including REACH & CLP)
 - IT
- Active involvement with PU industry associations
- ISOPA / Consortia / SIEFs
- Diversified customer network, from medium and small enterprises to large global corporations

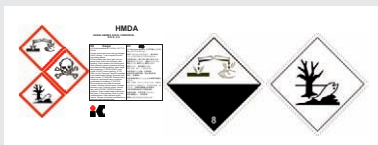

Our strength: Serviced solutions for small, medium and large organizations.

S phrase(s)	26-28-36/37/39-45-61
CAS no.	1761-71-3
EINECS no.	217-168-8
Pictograms	C T N
Signal word	Gefahr
H phrases	H314 H330 H411

Why are we here?

Increasingly complex and stringent legal and market requirements.

Whether you are an SME or large corporation we will, by using expertise and tools adapted to your specific needs, assist you to fulfil your regulatory responsibilities.

Our objective is to fulfil your desire to ensure the safe use of your chemicals.

We can provide the tailored solutions for your particular needs. With communication changing dramatically, we are partners in that change for you to stay competitive.

We strongly believe that “safe use” is more than “being in compliance”. Safe use is about accountability, the right behaviour and attitude.

- European level
 - REACH / CLP / GHS / Product safety law
 - 2015 is CLP deadline for formulations
- Member state level
 - Exposure limits
 - Pictograms
 - Languages
- Industry specific constraints
 - Sector specific Blacklists
- Customer expectations
 - Suppliers to take care of these issues
- Competitive pressure
 - Same level of support as given by the big 4

We combine know-how,
IT, vision and global
experience

“If you connect people with safe use information, they make chemistry safe creating more innovation, more creativity, more opportunity”

Your legal accountability is important.

We make the connection along the supply chain from the supplier to the end user.

Producer / Importer understands uses, generate SDSs, exposure scenarios, classifications, labelling

Transporter follows transport instruction, Tremcard and Transport labels

What do you need to do?

You are in charge of the safe use of your chemicals.

- Authenticate incoming (e)-SDSs
- Publish REACH / CLP compliant SDS and labels
 - Ensuring consistency between SDS and labels
- Communicate to DSUs
 - Record and track communication
 - Prove appropriate information has been delivered
- Manage changes
 - Legislation, information
- Generate transport and user labels
- Develop “safe use” work place instructions
- Pass inspections
 - Supporting documentation for inspectors

Legal requirements with penalties for non-compliance

Formulator

protects workers and the environment by applying safe use instructions

Enduser

expects products which provide high level of protection of human health and of the environment

Recycler

expects transparent chemical information

How can we help you?

I+K offers a fully integrated system.

- Review and assessment of current (extended) Safety Data Sheets (e-SDSs) and labels
- Authoring and maintenance of SDSs / e-SDSs and labels which would be guaranteed to meet CFP certification requirements
- Distribution of SDSs and labels via SAFIN.NET with maintenance of records
- Assistance with interpretation of supplier SDSs and e-SDSs and implementation of actions required under REACH for ensuring the safe use of chemicals
- Training of managers and others in the development of a safe use culture within an organization
- and much more

Modular approach, customised to your business requirements

Date and Law

ECHA

REACH

CLP / GHS

ICCA

- Single data entry, to ensure compliant & consistent:
 - (Extended) Safety Data Sheets
 - Worker safe use instructions
 - Use and transport labels
 - Use of standard phrases
 - Intelligent data processing
-

SAFIN.NET - Available Languages

SAFIN.NET provides **39** languages for safety data sheets:

Albanian	Dutch	Hindi	Lithuanian
Beylorussian	English	Hungarian	Macedonian
Bulgarian	Estonian	Indonesian	Malay
Chinese	Finnish	Italian	Norwegian
Croatian	French	Japanese	Polish
Czech	German	Korean	Portuguese
Danish	Greek	Letish	

SAFIN™: Safety Information, trade mark of I+K Ltd., Zurich

[I+K Ltd.](#)

- Automatic incorporation of European and member state requirements
- Stand alone or integrated with other systems, e.g. SAP

- System automatically maintained up to date
- Security of data

Make “safe use of chemicals”

- Experience a world of “legal compliance” and “safe use of chemicals” where everything intelligently connects and where every one has instant access to essential information along the supply chain of the chemical.

A “communication network”

1. You define the chemistry
2. We provide the solution via collaboration, as part of state-of-the-art IT, compliant safe use information, networked access
3. Your benefit is in legal accountability, regulatory compliance, business integration, cost-saving

Your successful implementation is our business objective.

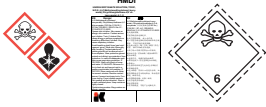

- Proof of compliance and downstream communication
- Customers can access on demand, anywhere, anytime

- Labels can be generated on site or ordered
- SAFIN.NET is scalable to include the entire chemical portfolio

What makes the difference?

Safin.net

Label

HMDS
Hazardous Material Data Sheet

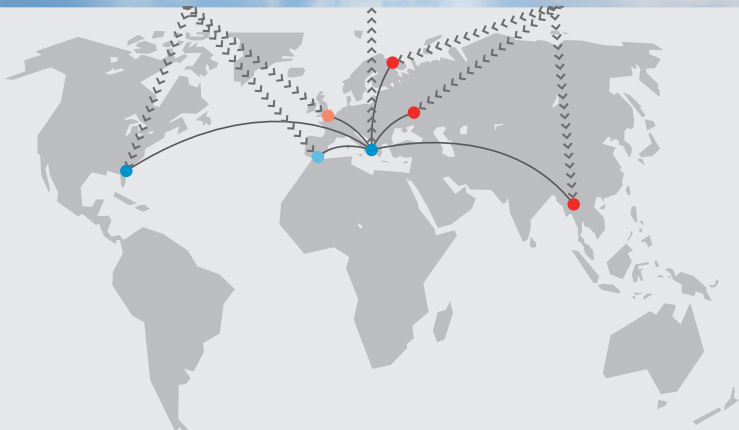

SDS / eSDS

SAFETY DATA SHEET

1. Identification of the substance/mixture and of the company/undertaking

2. Hazard identification

● Producer ● Importer ● Warehouse ● Downstream User

Cloud computing makes your safe use information available to your Downstream Users anywhere in the world at any time day or night.

Your compliance Cloud is the recipient and holder of your compliance docu-

ments and delivers them fully networked and integrated throughout your chemical supply chain anywhere in the world. And you can decide when you want to offer this same service to your customers and other downstream users providing access to the same dedicated compliance cloud.

I+K Information and Know-How Ltd.
