4. FIRST AID MEASURES

Eye contact: Irrigate thoroughly with water for at least 10 minutes. If persistent irritation occurs, obtain medical attention.

Skin contact: Avoid prolonged contact. Wash thoroughly with water, using soap if available. If persistent irritation occurs, obtain medical attention.

Inhalation: Remove to fresh air. If rapid recovery does not occur, obtain medical attention.

Ingestion: Do not induce vomiting. Wash out mouth thoroughly with water and give plenty of water to drink. Quantities of 150ml or more should be considered as potentially lethal and **IMMEDIATE** medical attention sought.

5. FIRE-FIGHTING MEASURES

Specific hazards: Hazardous combustion products may include carbon monoxide. The vapour is heavier than air, spreads along the ground and distant ignition is possible.

Suitable extinguishing media: Alcohol resistant foam, water spray or fog. Carbon dioxide, dry powder, sand or earth may be used for small fires only.

Unsuitable extinguishing media: Water in a jet.

Protective equipment: Full protective clothing and self-contained breathing apparatus.

6. ACCIDENTAL RELEASE MEASURES

If the liquid component is spilled, eliminate all possible sources of ignition; mop up with plenty of water and flush to waste with water. Ventilate area to dispel residual vapour and avoid contact with skin and eyes.

11. TOXICOLOGICAL INFORMATION

Information for 100% Isopropyl Alcohol Solution:

Acute toxicity - oral: LD50 > 2000mg/kg
Acute toxicity - dermal: LD50 > 2000mg/kg
Acute toxicity - inhalation: LD50 > 5mg/l
Eye irritation: Slight irritant
Skin irritation: Slight irritant

12. ECOLOGICAL INFORMATION

Dissolves in water; lost within a day by evaporation and dissolution. Readily biodegradable oxidises rapidly by photochemical reactions in air. Does not bioaccumulate. Can pose a significant risk of oxygen depletion in aquatic systems if discharged in large volumes.

However no environmental hazard is anticipated with the small volumes associated with this product, provided that the product is handled and disposed of with due care and attention.

13. DISPOSAL CONSIDERATIONS

After all the wipes in a canister have been used, any small amount of residual liquid can be flushed to waste with water. The canister and lid can then be recovered and recycled according to current legislation.
